Essential Tips for Happy Plants

Tip 1

Water Wisely

Watering your plants too often can do more harm than good. Let the top 1-2 inches of soil dry out before watering again!

Tip 2

Find the Right Light

Not all plants love the sun! Check the light requirements for each plant and place them where they'll thrive—indirect light for low-light lovers, and sunny spots for sun seekers.

Tip 3

Keep Humidity in Check

Many indoor plants love humidity! Mist your plants or use a humidifier to give them the moisture they need to stay healthy.
